**Explanations to section C: Result of Search**

**Column: Cat(egory)**

It means:

- X: Publications which alone question the novelty or existence of inventive level (§ 43 PatG) / of an inventive step (§ 7 GebrMG)
- Y: Publications which in combination with other publications question inventive activity (§ 43 PatG) / an inventive step (§ 7 GebMG)
- A: general information as to prior art, technological background
- O: non-written publication, e.g. a lecture held in public prior to the application or priority date and printed in a later published print
- P: publications published within the priority period
- T: publications published later and not being colliditive, which publications relate to the theory of the filed invention and might be useful for better understanding of the filed invention or which show that thoughts or facts on which the filed invention is based can be wrong
- E: elder applications under § 3, sec. 2 Patent Act (for searches under § 43 Patent Act); elder patent applications or elder utility models under § 15 Utility Model Act (for searches under § 7 Utility Model Act)
- D: publications already cited in the patent application (in searches under § 43 PatG) / publications which already are cited in the applicaiton or the utility model (in searches under § 7 GebMG)
- L: publications cited for a special reason, e.g. with respect to the date of publication of a citation or in case of doubt as to priority

**Column : Explanations**

The explanations given in the search proceedings and the relevant sites are listed in this column separately from the cited publications. The used abbreviations and symbols at the citation of a publication mean:

- Publ.: publication date of a publication within the priority period
- =: publications going back to the same country of origin („patent families“) or to which lectures or abstracts refer
- In statements of class/group without citation of publiation the following symbol means.
- “—“: nothing was found

**Column: Caim(s) concerned**

Here the claims are cited with correlation to the points cited as being relevant in column “explanations”.

**Note as to patent literature:**

The listed patent literature can be read in the laying-open halls of the German Patent Office, 80331 Munich, Zweibrueckenstrasse 12, or in 10969 Berlin, Gitschiner Strasse 97.; German patent publications, laying-open publications and printed applications can also be read in the patent information centers. A listing on these patent information centers can on request be obtained from the German Patent Office as well as some private firms.

Online searches relating to patent publications from all over the world , which are included into the data base of the office's German patent information system DEPATIS can be carried out free of charge using <http://www.depatis.net>.
